Supervisor's name	

Brief description of nature of research and involvement of participant: The research is about increasing the situational awareness of real time network monitoring tools and because situational awareness of network activity needs to be maintained to ensure an appropriate response to attacks and the efficient management of network resources. We researchers want to learn from your experience of using visualisation only (Snort) and sonification (SoNSTAR) tools for network monitoring purpose to support situational awareness. AS participant, you will be asked to perform three tasks of network monitoring using both tools and will be asked to fill out questionnaire designed to collect specific information for each task condition.

****Statement of participant consent (please tick as appropriate)**
